

Students

Student Membership in the IACP is open, but not limited, to disciplines such as psychology, psychiatry, social work, medicine, nursing, dentistry, rehabilitation, guidance, pastoral counseling, general medical practice, counseling and education.

IACP hopes to represent and serve the needs of students from all parts of the globe who are interested in CBT. We have formed an IACP Student Committee to help increase representation of IACP student members from all over the world and to facilitate dialogue between students world-wide. The Student Committee will also assist the IACP board on IACP related projects. If you would like to become a student member, please email us at IACPstudents@gmail.com
